

The Oxford County Citizen.

VOLUME XXIII—NUMBER 12.

BETHEL, MAINE, THURSDAY, JULY 26, 1917.

\$1.50 IN ADVANCE.

BETHEL'S WORK FOR NAVY LEAGUE

Three bright-faced, small girls with ribbon-bowed heads bent close together over grey knitting. A pretty picture seen lately on a village porch, and one often repeated, with variations, in a walk through our streets. It does not take a very long stretch of the imagination to fancy these little girls years hence, telling to the children of another—and, please God, a happier—day the story of how they learned to knit, when their countrymen went out in the greatest of wars, to battle for the rights of the world, to "endure hardness like good soldiers," to give their lives, if need be, that liberty might not perish from the earth.

Not only little hands. Worn fingers are at work, fingers that have been busy before for their men gone forth to war. All through the town women and girls of all ages—in one house four generations, in several three—are knitting, in a pleasant spirit of comradeship and with an enlargement of sympathy and comprehension which is one of the blessed by-products of the war work.

More than that. There is no service for their country too great or too small for the Boy Scouts to undertake, and some of them too are doing an extra bit in this way.

Perhaps there is no benefit which wealth can confer so great as the opening of opportunities for effective work to noble ends. And among all the many things for which we as a community are indebted to Mr. William Bingham, 2nd, and Mr. William J. Upson there is none for which they more deserve our gratitude than this of financing and organizing on so large a scale their work for the Navy League in such a way as to make us all co-workers with them.

While ago some said, "This is a small town. Won't the work of the Navy League detract from that of the Red Cross?" Happily, in no way. For the joy and power of service is something which grows by use and the women who meet twice a week at the Red Cross rooms work on amano and with no less zeal that they are all knitters as well. And the young men behind the League work are the largest contributors to that of the Red Cross.

Miss Pease, who has entire charge of the work, brings her marked executive ability and enthusiasm to the service, and the personal relations which she establishes with her corps of knitters for them another of the pleasant by-products of the work.

The Navy League was founded in 1903. Of the distinguished founders, Theodore Roosevelt heads the list, a man, by the way, not too often accredited with the pacific sentiments of the preamble, which reads as follows:

"The Navy League is an association of people who wish to keep war out of the United States and who believe that the surest way to do so is to maintain a navy so large that no nation can get its forces across the sea to attack us." It sounds a bit like current history in the present crisis. But the Navy League is meeting the exigencies of modern history. It is under the Comptee of the League that the present work is done. The men of the navy have great need of many articles of comfort not supplied by the government, principally knitted things to keep them warm during severe weather and when engaged in exposed work in small boats, such as picket duty, microlaying, patrol boat service, etc. In time of war the need is immeasurably accentuated.

The need of the smaller craft is greatest. And it is to equip the eight by four men of the torpedo boat destroyers, Lamson, that we are knitting. The following letter to the chairman of the Comptee Committee may be of interest:

"Navy Department, Washington, May 18, 1917.

My dear Mrs. Fraser: The enlisted men on board the American Destroyers now in European waters were generously furnished by your Comptee Committee with sweet suits, mufflers and wristlets prior to their departure from the United States, and I am sending this letter to let you know that the same were most acceptably and graciously appreciated. Yours sincerely, Josephine Daniels, Secretary of the Navy."

Continued on page 8.

GRANGE NEWS

PARIS GRANGE. Paris Grange met July 21 at 8 p. m. Officers present: Master, Overseer, Lecturer, Chaplain, Secretary, Gate Keeper, Ceres and L. A. Steward. A beautiful wreath made by Dr. M. M. Houghton composed of different seeds grains and grasses and framed in a deep black walnut frame, was presented to Paris Grange by her in the memory of W. K. Grange, a former Secretary. A vote of thanks was extended to her for the gift. Backfield Grange was invited to visit with Paris Grange, Aug. 18, at 8 p. m. Paris Grange meets Aug. 4 at 1:30 p. m., when the first and second degrees will be conferred.

FRANKLIN GRANGE. Franklin Grange held its regular meeting Saturday evening, July 21. About thirty-five members were present. The following program was given: Music, Choir.

Quotations. Paper, "What the Women of the Grange have done," Mrs. Emily Felt Song, "America." By all.

Next meeting Aug. 4 at eight o'clock is an open meeting to which the public are invited. It is a box supper. All ladies are requested to bring boxes. The proceeds are for the benefit of the Red Cross.

GOULD'S ACADEMY ANNOUNCEMENT.

The Trustees of Gould's Academy announce the opening of the fall term on Tuesday, Sept. 11th, with the following corps of teachers:

Frank E. Hanson, A. M., Principal, teacher of Latin and Senior Reviews. Principal Hanson, who enters upon his twenty-first year as head of the school, will also conduct a class in School Management for the benefit of the Normal Department. His long and successful experience should be of great value in the conduct of this class.

Marian T. Pratt, A. B., Preceptor, teacher of French, History and Rhetoric. Miss Pratt filled this position for ten years in a highly satisfactory manner, and returns to Gould's after one year of teaching in a Massachusetts city high school. Her resignation one year ago was greatly deplored; her return to the school is a source of satisfaction to all who have the welfare of the school at heart.

Elmer O. Small, A. B., Sub-Master, teacher of Science and German. Mr. Small has already held this position for one year and won the esteem and good will of his pupils, the respect and confidence of the community.

Nellie L. Whitman, teacher of Mathematics and Bookkeeping. Miss Whitman needs no introduction, being one of the most painstaking, as well as one of the best known and best loved teachers in the State of Maine.

Marguerite B. McQuaid, the new head of the Teacher Training Course and teacher of Literature, is a graduate of Mt. Vernon High School, Deane Academy and Farmington Normal School. Miss McQuaid is a teacher of unusually successful experience, pleasing personality and marked individuality. She comes to this position highly endorsed by the State Department of Education.

More time and attention will be given to the work of the Teacher Training Course this year than ever before. This is made possible by a special appropriation by the State Legislature to extend the work of this course in Gould's Academy. Young people who intend to become teachers can find no better opportunity for training, outside our State Normal Schools, than right here in our own Gould's Academy. Graduates of this course are granted a State Teachers' Certificate without an examination.

Expenses, although slightly in advance of previous years, owing to the increased cost of fuel and of all food materials, are yet much lower than in most schools of like grade and standing. The cost of table board at Hall on Hall will be \$3.25 per week, or \$2.50 for those who regularly spend the week and at home. The cost of furnished room, including light and heat, is \$1.00 or \$1.25 per week, according to size and location of room. Girls wishing to board themselves pay the same as other pupils for furnished rooms and for \$30 per week additional have the use of basement kitchen and dining room. This room has steam heat and cold water and electric lights. A new cooking range will be installed before the opening of the fall term. The girls furnish needed fuel for the range.

Bethel is a village of unusual beauty.

MAINE'S DRAFT QUOTA None To Be Called From Oxford County on First Draft

Governor Carl E. Milliken issued the following proclamation in relation to the military draft in the State of Maine:

Proclamation to the Governor STATE OF MAINE, Executive Department, Augusta, Me., July 23, 1917.

By virtue of the authority vested in me by regulations prescribed by the President pursuant to an Act of Congress entitled "An Act to authorize the President to increase temporarily the Military Establishment of the United States," approved May 18, 1917, I, Carl E. Milliken, Governor of the State of Maine, acting for and by the direction of the President, do hereby, in accordance with said Act and regulations, apportion, as set forth in the schedule hereto appended, to the several counties (exclusive of cities in and for which one or more local boards have been established under the provisions of said Section 2 (c) of the Rules and Regulations prescribed by the President on June 24, 1917), and to the several cities in and for which one or more local boards have been established under the provisions of said Section 2 (c), and to the several divisions, in said State of Maine, the adjusted quota, the credits, and the net quota apportioned to said State of Maine under a draft for the aggregate number of one thousand eight hundred twenty-one men ordered by the President on July 3, 1917, by virtue of the authority vested in him by said Act of Congress.

The several local boards established in said State of Maine will furnish, as required by said Act of Congress and rules and regulations prescribed pursuant thereto, the net quota so apportioned to the respective counties, cities and divisions in and for which said local boards have been established.

(Signed) CARL E. MILLIKEN, Governor.

Maine's Quota 1821. Maine's quota has been found by the compilers of the figures in the provost marshal's office to be 1821 and the office of the provost marshal at Washington has accepted these figures and pronounced them correct.

Maine's gross quota was 7664, but the credits of enlistments in the National Guard and regular army reduced those figures to the 1821 mentioned. The population of Maine, on which the draft is based is 616,535. The division of the quota now required is divided among the counties as follows:

Androscoggin 145; Aroostook 436; Cumberland 9; Franklin 4; Hancock 228; Kennebec 6; Knox 178; Lincoln 37; Oxford 0; Penobscot 129; Piscataquis 6; Sagadahoc 6; Somerset 85; Waldo 124; Washington 174; York 158; total 1821.

The credits mentioned consist of the men enlisted on April 1, 1917, in the National Guard of Maine, those enlisted on April 2 to June 30 inclusive in the same organization and those who enlisted in the regular army. These enlistments all amounted to 5243.

Owing to the fact that an accurate list of the draft for Oxford County cannot be obtained this week we will defer the publication until next week when we hope to obtain a verified list.

FOUND.

A carriage robe in the road between Swan's Corner and Artist's Bridge. Owner may have same by proving property and paying for this advertisement.

C. B. FOSTER, No. Bethel, Maine.

and the school possesses a heritage of inspiring traditions. The people of the town have high ideals, are religious and educated, and are loyal to the school and to all its interests. The church and social relations are far ahead of the ordinary New England village. Parents can send their sons and daughters to Gould's Academy confident in the assurance that they will be surrounded by the highest Christian influences, and that they will receive that care and protection which discriminating parents regard of far greater value than any knowledge that can be learned from books. For catalogue and further particulars, or to engage board or room, address Frank E. Hanson, Principal, Moosale Falls, Maine.

CHURCH ACTIVITIES

UNIVERSALIST CHURCH.

Next Sunday will be the closing service at this church before vacation. Subject of sermon, "A Chosen Vessel."

The church will be open again in September when work in all departments, including Sunday school and Y. P. C. U., and Y. M. U. A. will be resumed.

METHODIST CHURCH.

Next Sunday service morning worship at 10:45, sermon by pastor, third in the series on the subject, "The trial of faith and the reward of faith." Epworth League service at 7:30. Short sermon by the pastor at 7:30. The young people met at the parsonage Thursday night. During the evening the Bethel chapter of the Epworth League was organized with 17 charter members.

The Ladies' Aid will hold their entertainment, Thursday evening, Aug. 2.

CONGREGATIONAL CHURCH.

Sunday morning worship at 10:45. Text, "The Kingdom of the World is Become the Kingdom of Our Lord and his Christ."

You may look for some choir next Sunday as Dr. Wight will take a hand in it.

The Christian Endeavor service in the evening at 7 o'clock will be led by Mrs. Chandler.

The Ladies' Club will meet with Miss Mattie Foster, Thursday afternoon at three o'clock.

Mid-week social service Tuesday evenings at 7:30. Strangers cordially welcome.

NEAL-WOODMAN.

Carlton Everett Neal and Olive Mary Woodman, both of Auburn, were married at 9 o'clock last Wednesday evening by Rev. H. B. Williams, pastor of the Court Street Baptist church of Auburn. They were unattended and the single ring service was used.

The ceremony was performed at the home of the bride's parents, Mr. and Mrs. Nathan T. Woodman of 50 Lake street, with only members of the families present. The rooms were attractively decorated with cut flowers.

Mr. Neal is a graduate of Edward Little High School in the class of 1911 and is the son of Mrs. Alice Neal of Jefferson street, Auburn. For the past few years his time has been spent in Bethel and at present he is employed as clerk at Bethel Inn.

Mrs. Neal has been a teacher at Miss Storey's kindergarten school for the past five years. Both bride and groom are members of the First Universalist Church of Auburn.

During his stay in Bethel Mr. Neal has made many friends and all join in wishing him a long and happy married life.

Soon after the ceremony Mr. and Mrs. Neal left Auburn by auto for Bethel and were met outside of the village by a reception committee of twenty who escorted them in a royal manner to the home of Mrs. J. C. Billings, where they will be at home to friends after August 1st.

CHANGE OF DATE.

Annual Picnic of Oxford County Field Day Ass'n., O. C. R.

On account of Chautauque week at Norway, the date of the annual picnic gathering of the Oxford County Field Day Association, Order of the Eastern Star, has been changed from August 1 to Tuesday, August 21, 1917.

By order of Mrs. Celia H. Sturtevant, President of the Association.

Mrs. Ada E. March, Secretary.

LOST.

Between Bethel Village and Newry Corner a tan colored automobile top cover. Finder please return and receive reward.

E. G. SHERWIN, Bethel, Maine.

LOW PRICED FARM WANTED.

I am looking for a farm costing between \$500 and \$1,500. Do not object to going 5 or 7 miles from a good town. Address

BARGAIN, Box 144, Newry, Maine.

NOTICE.

Beginning Saturday, June 18, the Citizens office will be closed Saturday afternoons during the summer.

BETHEL INN

Happenings of the Week

Mrs. Caroline Eames is making her home at the Inn for the summer.

Mrs. L. F. Blanchard entertained a party of ten at dinner on Saturday evening last. They all enjoyed the dancing after dinner.

Business at the Bethel Inn has been very good this last few days, many motorists making this their noonday stop and many others spending the night.

Miss Alla Libbey and Miss Ethel M. Carson have returned to Bethel after a trip through Canada. They will spend some days at the Inn before returning to their home in Cambridge.

On Tuesday evening we had a very fine entertainment for the benefit of the Red Cross. Miss Mira Kesca, who is well known in operatic circles, was the artist. She has a beautiful voice and her songs were appreciated by everyone.

Of the several enthusiastic anglers at the Inn Miss Alla Libbey has been the most fortunate having made some very good catches. One day last week she caught several good sized pickerel and bass at Songo, one measuring nineteen inches.

Mrs. W. J. Upson made a flying trip to Bethel on Thursday, bringing with him his nephew, Burton Rose and Wm. Foster from the Camp at Harrison, where they are spending the summer. Mr. Upson is spending some time at the benches motoring from place to place as the fancy takes him.

Mr. and Mrs. W. L. Parker of Lowell, Mass., stopped over night at the Inn on Thursday. Mrs. Parker was looking up childhood friends and relatives of her mother who lived between Bethel and Rumford Point, and was delighted to locate cousins who remembered her when she visited here as a child.

Mrs. Lynn Faulkner and son, and Mrs. Dorothy Dell of Seymour, Ind., were week end guests. They have motored from Indiana, through Ohio, New York State, Northern Vermont and New Hampshire, taking in all the principal points of interest, and they stated that Bethel Inn was the most charming they had yet seen. From Bethel they were going to Bar Harbor, then follow the coast to Atlantic City, Washington, and home.

A party of seven ladies in two automobiles, Miss A. W. Sowell, Mrs. John Kimball, Mrs. G. C. Moses and Miss C. L. Meeker all of Bath, Maine; Mrs. Houghton Kimball of Boston, Mass., and Miss McIlwain of Philadelphia arrived at the Inn last evening to spend the night but were so well pleased that they have decided to stay over another day. They are luncheon at the Bal-sams today and will return in the afternoon.

FOR SALE.

Standing grass on the J. B. Chapman place. Inquire of MARY CHAPMAN, Bethel, Maine.

FOR SALE.

Standing grass on Martin Lyden place in Greenwood. MARTHA E. BARTLETT, Hanover, Maine.

BERRY PICKERS WANTED.

35 1-3% Increase in Prices Paid. I have fifteen acres of cultivated Raspberries to be picked in August and the prospect is that the crop will be the heaviest for many years. I expect to get at least fifty thousand baskets and am prepared to take care of several thousand more.

I shall need a very large number of pickers about August 10th. Berries are very late this season. Nearly three weeks later than usual.

I can board about thirty-five at the farm house. Board furnished at \$2.50 per week. I will give a discount of \$1.00 per week on the board bill to all good pickers who stay until the picking season is over. This will make the board cost only \$2.50 per week and the price paid for picking will be 50 per cent instead of 150 per cent basket, the price I have paid for many years.

H. F. MAXIM, Locke's Mills, Maine.

WANT COLUMN.

Put your Want and Sale notices here and they will be read in 3,000 Oxford County homes—4 lines, 1 week, 25c. 3 weeks 50c.

NOTICE.

I wish to announce to the people of Bethel and vicinity that I am prepared to do all kinds of plumbing and repair work at a reasonable price, also sheet metal work. All work carefully and promptly attended to.

TABLE TALK.

We Women Must Plan That Nothing
Shall Be Lost from the Garden.

Anna Barrows, Instructor Teachers'
College, Columbia University.

All over our land, the one word on the lips of every person, is "preparedness." We are warned by the government experts and officials to avoid waste, since aside from our exports to Europe, the food production of the United States has hardly kept pace with its increasing population.

In city and country alike we are all being urged to use every available foot of ground for vegetable production.

Mothers can back up the efforts of parliament and the United States Bureau of Education, to secure similar co-operation of all school children in their club gardens at school and at home.

More than ever we women must plan that nothing shall be lost from the garden that may be canned or dried for the future. The supply of the canning factories for 1916, is said to be lower than is usual at this time in the year.

The canning plants are arousing interest in this work in many communities, and that interest should be extended as widely and enthusiastically as possible.

Unfortunately, cans of tin and rubber rings, are likely all to be higher in price. It is none too early to gather together every utensil available, to find the tops that fit and to clean all, so they may be ready when needed.

If some of us cannot secure as many up-to-date receptacles as we should like for putting away fruit and vegetables, still there is no excuse for any waste since nearly every product may be preserved by evaporation or by packing in salt.

Foods prepared in this way of course must be soaked and freshened before using, but if that is done properly they are quite as good as when taken from a can.

Halfway between drying and pickling is the process of salting down the cucumbers or greens or sweet corn.

The small cucumbers or other vegetables are cleaned and must be free from spots of any kind. They are put in layers in a wooden skin or stone jar, and coarse salt is sprinkled in all crevices. The salt dissolves by drawing out some of the water from the vegetables and this strong brine and the substances formed by it preserve the plant tissue. The brine must wholly cover the contents of the vessel and this is done by placing a weighted plate, smaller than the circumference of the vessel, on top of the contents.

This plan was devised to take care of the little cucumbers as they were cut day by day through the season. Later in the winter as pickles are wanted, a few at a time are freshened by soaking in water.

When vegetables are to be kept for a few days only, a small proportion of salt is used with water, one cup of salt for a gallon of water. For a month's preservation one or two pounds of salt to a gallon of water will be required.

The high prices this spring for cabbage and onions, will make it necessary to have an ample supply in our home gardens.

From several causes which I need

not dwell on here, many foods, especially meats and potatoes, have been very high in price. It appears probable that even good crops this summer will not fully set things right. Therefore, it would be well to make new food combinations and learn to use foods we have not hitherto included in our bills of fare.

The United States Department of Agriculture is publishing help toward economy. One new bulletin which you may care to send for is Farmers' Bulletin 469, Fats and Their Economical Use in the Home. Write for it to Joseph A. Arnold, Division of Publications, United States Department of Agriculture, Washington, D. C.

For those who live in the South the dashen offers a possible substitute for potatoes but it is not adapted to the North.

Corn and rice are not as high as either wheat or potatoes so we should use them in as many ways as we can.

While rice is a substitute for the starchy part of the potato it needs some other green vegetable to accompany it to supply the mineral matter which is more abundant in the potato. All greens do good service here.

If lettuce, celery, prunes or fresh fruits appear daily on our tables, rice and corn in various forms may keep us from missing the potato very much until the new ones are here.

Now is the time to use the young meats, veal and lamb rather than beef and pork. As eggs are probably still at their best and cheapest we may indulge in custards and sponge cake but remember that we need less meats when we use such desserts.

There are always some imperfectly developed berries especially if the season is dry. These should be sprinkled with sugar, masked and squeezed in a cheesecloth until only a ball of seeds is left in the cloth. This juice combined with twice as much thin cream and more sugar and then frozen will give the very best sort of strawberry ice cream. When whole or cut berries are put directly into the cream they are likely to freeze in unpleasant lumps of ice.

Joice prepared in this way from inferior fruit may be sterilized and bottled like grape juice. Care must always be taken to discard berries that are over ripe.

Asparagus on toast is good for breakfast if there is more in the garden than can be consumed at other times.

When carrots and beets were started early, they may be thinned now and used for the over welcome and nutritious greens.

It is a help to economy to plan meals ahead. Try a whole week's menu something like the one given below. It will save time, strength and perhaps money.

Monday.
Breakfast: Stewed bananas, cream of wheat, scrambled eggs on toast, coffee. Dinner: Roast beef with stuffing and brown gravy, boiled rice, asparagus, pickles, potato salad, ice cream, cake. Supper: Sandwiches, relish and lettuce salad, toasted crackers, canned

cherries, cookies.
Monday.
Breakfast: Hot corn muffins, bacon, stewed rhubarb, coffee. Dinner: Cold sliced veal, rice croquettes, greens, caramel custard. Supper: Stewed beans, baking powder biscuit, strawberries.

Tuesday.
Breakfast: Shredded wheat, stewed prunes, minced veal on toast. Dinner: Ham baked in milk, asparagus, potatoes, rhubarb, raisin pie. Supper: Parsnip and potato stew, pickles, bread, chocolate cake.

Wednesday.
Breakfast: Oatmeal, bread, omelet, coffee. Dinner: Tomato soup, halibut, macaroni and cheese, cornstarch pudding with strawberry sauce. Supper: Lettuce salad with stuffed eggs, bread, warm gingerbread.

Thursday.
Breakfast: Puffed cereal, oranges, griddle cakes. Dinner: Baked liver with bacon gravy, scalloped tomatoes, baked potatoes, pineapple ice with walnuts. Supper: Halibut hash, yeast rolls, stewed rhubarb, cookies.

Friday.
Breakfast: Graham muffins, boiled eggs, strawberries, coffee. Dinner: Broiled mackerel, potatoes, beet greens, strawberry shortcake. Supper: Pea soup, lettuce and radishes, bread, stewed raisins.

Saturday.
Breakfast: Hot cornmeal mush, toast and eggs, coffee. Dinner: Roast lamb, potatoes, young carrots, tapioca cream. Supper: Salmon salad, biscuit, strawberries, cake.

WEST GREENWOOD.

Mr. and Mrs. Martin of Waterford and Mr. and Mrs. Leighton of Hant's Corner were Sunday guests at the home of Mr. and Mrs. Jones.

Miss Annie Driscoll of Andover, Mass., was in town recently, accompanied by her sister Katie, a lady friend and Nellie Cadigan of Rockdale Mass. They made a short call with their friends and relatives, then returned to their camp in Andover, Me., where they are spending a short vacation.

Mrs. Fletcher and children spent Sunday with her parents in town.

Miss Mary Lydon of Portland arrived Wednesday to spend her vacation with her brother, Martin Lydon.

Mr. and Mrs. Albert Felt of Portland called on friends and relatives on Howe Hill, Thursday.

Miss Annie Cross spent Saturday at Bryant's Pond.

Tom Iergan of Haverhill, Mass., made a short stay with his mother, recently.

Mr. and Mrs. Wheeler and child of West Paris spent the week end with her sister, Mrs. John Kennagh.

A George Hadakia is working for W. A. Holt.

Deley and Perry Rainey were in Massachusetts a few days last week. Among those who were in town last week were: Mrs. Will Lane, Allan and Charles Bartlett, Charlie Lydon and Mr. and Mrs. Abner Kimball.

CANTON

Leander L. Kilbreth passed away at the home of his son Maurice Kilbreth, of South Livermore, Sunday morning at the age of 74 years, following an amputation of his leg about a week ago. He was born in Hartford, the son of Samuel Kilbreth and Serena Stetson Kilbreth. He married on Oct. 7, 1865, Miss Clara Swan of Bethel and they had four children, three of whom survive, Mrs. Stella Marston of Hartford, Maurice D. Kilbreth of So. Livermore and William Kilbreth of Ayer, Mass. Another son, Maurice, passed away in infancy. He married for his second wife Miss Bessie Hall of Canton who survives together with two sons, Edward and Herbert Kilbreth. He is also survived by six grandchildren and one great-grandchild, and one sister, Mrs. Cynthia Tilton of Buckfield. He was a veteran of the Civil War, and a member of the 8th Maine, Company C, re-enlisting in Company I. He has been a farmer and was always interested in good horse flesh and an expert trainer of horses. He was the first R. F. D. carrier from Canton post office.

Allice Curran has returned home from a year's stay with her aunt in Massachusetts.

Fred Stetson and family of Hartford were Sunday guests of Mrs. F. W. Dodge and family.

Randolph Hersey of Montreal and Phil Hersey of California are guests of their sister, Mrs. John P. Swasey and family, and other relatives.

The Universalist Circle met at the Red Cross rooms Thursday to sew for that Society. Ice cream was generously furnished by the president, Mrs. Marion A. Smith.

Mrs. Ethel Potter and little son of Portland have been guests of her parents, Mr. and Mrs. M. B. Packard. Gerald Newman of Auburn has been spending a week with his grandparents, Mr. and Mrs. W. A. Lucas.

Carl Small, one of the Junior Volunteers, is employed on a farm at Crouseville.

A terrific thunder shower accompanied by a downpour of rain and large hail stones passed over Canton, Sunday night.

Mrs. Nellie Aris of Mechanic Falls has been on a visit to her father, Wm. Wetmore.

Mrs. Jennie Draper of Mechanic Falls has been called home by the illness of her father, Wm. Wetmore, of Gilesville.

Mr. and Mrs. Windsor Wyman of No. Abington, Mass., have been in town the past week for a short stay at their summer home, which has been purchased by E. A. Collins of Massachusetts.

Mr. and Mrs. Ernest Whittemore and little daughter have been guests of Mr. and Mrs. Geo. H. Johnson.

Mrs. Marcia Jones of Sanford has been spending her vacation with her parents, Mr. and Mrs. S. T. Jones.

Mrs. Jennie P. Hollis is spending a week at Old Orchard.

Mrs. E. A. Daniels and son, Orlan, of New York have been guests of Mrs. Daniels' sister, Mrs. Jennie H. Tilley and family. Prof. Daniels, who has taught school in New York City for a long term of years has been retired on a pension and is moving his family to his old home on Park Hill.

Mr. and Mrs. E. W. Howe of Rumford have been guests of Hon. and Mrs. John P. Swasey and family.

Mrs. Marie Dishes of Evansville, Ind., and Mrs. Hulda Jackson of Auburn are visiting their nephew, E. L. Bibeau, and family, and other relatives in town.

NORWAY, MAINE

IRON INDUSTRY IN FIRST HALF OF 1917.

Abnormal conditions prevailed in the iron industry during the first half of 1917, mainly on account of the war in Europe. At the beginning of the year, when pig iron was being made at the average rate of about 105,000 gross tons daily, the blast furnaces were operated at slightly reduced capacity, according to E. F. Dorchard of the United States Geological Survey, Department of the Interior. This rate dropped to less than 95,000 tons daily in February, but in March the rate rose to 105,000 tons daily, and in April and May it stood at more than 110,000 tons, compared with the maximum rate of 112,000 tons in October, 1916.

The prospective blast-furnace capacity seems not to have kept pace with the demand, however, as is indicated by the enormous increases in price, especially since the United States entered the war.

The total output of coke and anthracite pig iron in the first five months of 1917 was about 15,800,000 gross tons, compared with about 16,175,000 tons during the corresponding period of 1916, a decrease of 3 per cent.

The quantity of iron ore from mines in the Lake Superior region shipped from upper Lake ports from January 1 to June 1, 1917, was about 8,300,000 gross tons, compared with slightly more than 19,100,000 tons for the corresponding five months of 1916, a decrease of about 5,800,000 tons, or more than 35 per cent. This apparently large decrease in ore shipments from the principal producing region was not due to inability to mine ore but largely to the belated opening of Lake traffic because of ice blockades and to many ore-carrying boats having been put out of commission through accidents.

Plans are being made by committee of the Council of National Defense to increase shipments of iron ore, coal, and coke during the remainder of the season through cooperative methods, and possibly the June shipments will nearly equal those of June, 1916. In the meantime the blast furnaces have been drawing on large

stocks of ore at lower Lake ports in order to offset the deficiency in upper Lake shipments. Deferred shipments of coke and other causes of traffic congestion have also retarded operations at some furnaces.

Prices of pig iron at western Pennsylvania furnaces have advanced since January 1, 1917, 61 to 77 per cent and since a year ago 164 to 200 per cent. On July 3, 1917, basic iron was quoted at Valley furnaces at \$52 a ton, Bessemer iron at Pittsburgh at \$57.95, and No. 2 foundry iron at \$55, while at Birmingham, Ala., foundry iron, which one year ago sold at \$14 brought \$17 a ton. Low-phosphorus iron has been quoted at \$70 to \$80 a ton. Feverish buying of pig iron by private consumers who were endeavoring to provide for their present needs, as well as for their needs far into 1918, has caused much of the recent increase in price.

The extent of the Government's war needs for steel is not yet defined, but increasing. Orders are being placed slowly, however, and they should not interfere seriously with deliveries of steel to private consumers. As the Government is not compelling in price it would seem that there may be at least some warrant for belief that prices may eventually adjust themselves without need for further great inflation.

BRYANT'S POND.

Walter Bacon went on a business trip to Auburn, Saturday.

Allen J. Hathaway of Littleton, Mass., is visiting his parents, Mr. and Mrs. J. E. Hathaway, for several days.

Mr. G. B. Wyman who has been visiting in Peru, returned to J. E. Hathaway's, Sunday.

WOMEN OF MIDDLE AGE

Mrs. Quinn's Experience
Ought to Help You Over
the Critical Period.

Lowell, Mass.—"For the last three years I have been troubled with the Change of Life and the bad feelings common at that time. I was in a very nervous condition, with headaches and pain a good deal of the time so I was unfit to do my work. A friend asked me to try Lydia E. Pinkham's Vegetable Compound, which I did, and it has helped me in every way. I am not nearly so nervous, no headaches or pain. I must say that Lydia E. Pinkham's Vegetable Compound is the best remedy any sick woman can take."

Mrs. MARGARET QUINN, Rear 300 Western St., Lowell, Mass.

Other warning symptoms are a sense of suffocation, hot flashes, headache, backache, dread of impending evil, fainting, sounds in the ears, palpitation at the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness, inquietude, and nervousness.

If you need special advice, write to the Lydia E. Pinkham Medicine Co. (Incorporated), Lynn, Mass.

Building Material

Do not think that prices on all kinds of building material have been advanced. Fortunately we had a large stock of many kinds before prices commenced to leap and we are giving our customers the advantage in these items. For instance:

13-16 Yellow Pine Flooring,	\$35.00 to \$55.00
13-16 Hardwood Flooring,	\$50.00 to \$60.00
13-16 Novelty Siding,	\$30.00
Roofing,	\$1.25 to \$1.75 per square

While doors and windows are higher we are below market price.

Our stock of mouldings is complete at old prices.

Packing and Trucking free.

Miss Stella Decker is spending her vacation with her grandmother, Mrs. George Decker, in Oakland.

IT'S EASY TO SMILE WHEN YOU'RE FEELING FINE

It's only natural to feel grouchy and to look on the dark side when your digestion is upset. But it's not necessary to drag along through the day that way. Just get a bottle of "L. F. Atwood's Medicine" and after a small dose you will soon feel yourself free from Biliousness, and looking on the bright side of life again.

This old dependable remedy, by correcting digestive troubles, constipation or biliousness, has helped to drive off many fits of the blues. It has made thousands of friends for itself in the past sixty years. Used discreetly, when needed, it will make you fit, friendly and will help you to feel well and friendly towards others.—See Bottle. "L. F." Atwood's Co., Portland, Maine.

BETHEL TESTIMONY

Home Proof, Here, There and
Everywhere

When you see Donn's Kidney Pills
recommended in this paper you must
always find the recommender a Bethel
resident. It's the same everywhere—
in 3,800 towns in the U. S. Fifty
thousand people publicly thank Donn's.
What other kidney remedy can give this
proof of merit, honesty and truth?
Home testimony must be true or it
could not be published here. Read this
Bethel recommendation. Then insist on
having Donn's. You will know what
you are getting:

C. L. Davis, coal dealer, Main St.,
says: "My back troubled me on ac-
count of doing heavy lifting. There
was a dull ache across my kidneys, and
my kidneys acted irregularly. Donn's
Kidney Pills, which I got at Bosser-
man's Drug Store, relieved the back-
ache and regulated my kidneys. I take
Donn's now to keep my kidneys in
good condition and always get prompt
results. I place great confidence in
them."

Price 60c, at all dealers. Don't
simply ask for a kidney remedy—get
Donn's Kidney Pills—the same that
Mr. Davis had. Foster-Milburn Co.,
Buffalo, N. Y. Adv.

Archie Mann, who has been one of
the heavy owners in the Mann Bakery
for a number of years, has sold his
share to his brother, Jim, and has gone
to Bath in the Jim Ship yard.

Mrs. Sadie McLucas is enjoying a
two weeks' vacation from her duties
as cashier for the E. K. Day Company.

Earl Kenney has moved from the
Livingston house on Pine street to
Mexico.

Mrs. Edgar McMenamin and baby
and Miss Margaret Barrett are visit-
ing at the home of Mrs. McMenamin's
parents in Fall River, Mass.

Miss Sadie Dennis is enjoying a visit
with friends at Roxbury Pond.

James Law and Alex Murdoch are
enjoying a two weeks' vacation from
their duties at the Oxford Mill.

Miss Eva Maroon, clerk for Mrs.
P. H. Martin, is enjoying a two weeks'
vacation with friends in Lewiston and
Berlin.

John Gallant is in Boston, where he
has undergone a surgical operation.

Miss Eva Maroon, clerk in the base-
ment of the E. K. Day store, is en-
joying a two weeks' vacation.

William Jennings Bryan will speak
in the Municipal Building, Rumford,
some time in November. Local par-
ties have entered into a contract with
the Redpath Lyceum Bureau for the
services of Mr. Bryan, and it is ex-
pected that a large number of people
will take advantage of the opportuni-
ty to hear him.

The H. P. Cummings Construction
Company has a crew of men building
the coffer dam to close the river chan-
nel at the site for the new concrete
dam on the upper falls. The shore
sections of this great project were put
in during the fall and winter of 1916.
The next move will be the construction
of the channel section, which of itself
is a big job. The other construction
work of this contract is going along
finely, the exterior of the great power
house being about completed, the stag-
ings having been removed showing
massive structure of brick and steel.

Dr. and Mrs. Harold Stanwood of
Franklin street have adopted a baby
three weeks old.

Mrs. Harry Carroll, who has been
very sick with pneumonia, is now able
to be up and dressed and out on the
porch of her home.

The community was much saddened
last week when they learned of the
death of Mr. Harris L. Elliott of Wash-
ington street, which occurred on Wed-
nesday afternoon about 1:30. Mr. Eli-
ott had been in failing health for some
time past. He was a man of great
prominence and activity in the town
and will be very much missed among
the townspeople. For the past five
years he has been the most efficient
superintendent of the Rumford and
Mexico Water District until when a
few weeks ago failing health caused
him to resign. For many years he was
a most successful deputy sheriff, after
which he became the manager of the
Oxford Insurance Agency. He was
very much interested in fraternal or-
ders, being a member of Strathglass
Commandery, Hazing Star Lodge, Old
Fellows, and Sons of Veterans. The
funeral services took place on Satur-
day morning last from the Universi-
ty church under the direction of Wm.
L. Under P. & A. M. The other
services attended in a body. The burial
was at Bryant's Pond. Mr. Elliott was
46 years of age, and leaves to mourn
his loss, his wife, who was Miss Isabel
Wyman of Bryant's Pond, one daughter,
Olivia, and a mother, Mrs. Myra
Elliott, who resides at Rumford Center.

Mrs. Charles M. Bishop had the mis-
fortune last week to fall the entire
length of the back stairs at her home
on Franklin street, and while it cannot

ANDOVER

Mrs. Guy Morton from Dover, N. H.,
is visiting her parents, J. A. Dunning
and wife.

Rev. Mr. Suter and son, John W.
Suter, Jr., left town Monday for
Springfield, Mass.

Fred Grover and Herbert Campbell
are hauling lumber from the Twitchell
lot at No. 4 to the mill.

Herbert Hutchins is laying for Y.
A. Thurston.

Mr. and Mrs. John Gammons, who
have been touring the White Mts.,
spent a few days this week with Mrs.
Gammons' father, John F. Talbot, be-
fore returning to their home in Prov-
idence, R. I.

Rev. Mr. Craig preached an inter-
esting sermon Sunday morning at the
Congregational church.

Mrs. George Thomas suffered an ill
attack Friday of last week.

The young people of the Congrega-
tional church will serve tea on the
common each Thursday afternoon from
3 to 5 o'clock.

Y. A. Thurston was exploring tim-
berland near Hiramford, Friday and Sat-
urday of last week.

Laura Hutchins and Viola Searles
are working at Bluemont Inn.

Virgil Cole and wife, who have been
in Michigan for several months, have
returned to Andover.

Ebon Hutchins and wife went to
Portland, recently, with their daugh-
ter, Eunice, who will have treatment
there for spinal trouble.

Bert Dunn has been suffering from
a sore on his foot caused by stepping
on a rusty nail.

Eileen Akers is employed as waitress
at Hotel Milton.

Lucene Smith was in Rumford last
week and had a successful operation
performed on her throat.

THE PATROL MAINTENANCE
LAW.

As there appears to be more or less
misunderstanding relative to the opera-
tion of the Patrol Maintenance law,
as called, the State Highway Com-
mission desires to make the following
statement:

The Patrol Maintenance law was en-
acted by the legislature in 1915 for the
sole purpose of helping each and every
town in the State in maintaining nine
or ten miles of their principal thor-
oughfare and to make it possible for
the state to apportion maintenance
money from the automobile license.

All the money used for maintenance is
taken from this fund and by adding
the State's and town's appropriations
together it makes it possible to have
sufficient funds to employ a man and
team to work regularly some five or
six months during the road building
season.

The patrolman in nearly every in-
stance is hired upon recommendation
of the municipal officers.

The State's apportionment in 1916 to
the towns under patrol was not less
than \$200.00 except in a very few in-
stances where the towns had less than
nine miles of road under patrol and in
many towns it was very much more,
where traffic was heavy and either a
large amount of gravel was needed or
bituminous surface treatment was used
to maintain the road.

The State's expenditure in 1916 was
\$101,730.12.

Beginning the year 1917 the Highway
Commission apportioned each town an
average for patrol maintenance
\$200.00 and in addition to this made an
apportionment of \$50.00 for each town
for road machine work, provided the
town would furnish a like amount, this
fund of \$100 to be used on the section
under patrol maintenance.

Nearly all of the towns accepted this
offer; a few did not. On an average,
the few that did not in each town is about
\$500.00. It cannot be expected that any
of this amount can be used in building
or repairing bridges and culverts or
any other work where a large sum of
money is necessary, because there
would be nothing left to take care of

be found that any bones are broken,
she is very badly bruised, one arm be-
ing entirely helpless and very painful.
Her condition has caused her to re-
sist.

Mrs. Mark Elliott of Rumford Cor-
ner is clerking in the store of the E.
K. Day Company.

WEST PARIS

Mr. and Mrs. L. H. Penley and son,
Donald, Mrs. Dora Jackson and Mr.
and Mrs. Bert Day motored to Port-
land, Sunday.

D. H. Field, P. C. Mayhew and wife
and Mrs. Mildred Davis enjoyed an au-
to trip to Glen Falls, Conway,
Fryeburg, Bay of Naples and Poland
Springs.

Miss Alice Bariden, Eva Tucker,
Madeline Peabody and Russell Briggs
are at Ferry Beach.

Mrs. Lena Herrieck has returned from
teaching and is at her rooms at S. T.
White's.

Mrs. Alice Curtis of Norway has
been a recent guest of Mrs. Sara E.
Curtis.

Hazel Hammond of Massachusetts is
visiting her uncle and aunt, Mr. and
Mrs. H. G. Brown.

C. P. Dunham, wife and son, Ray-
mond, of South Paris were at his par-
ents', Mr. and Mrs. H. W. Dunham's,
Monday.

Lois Day of Bethel recently visited
her aunt, Mrs. Jesse Pierce.

Mr. and Mrs. C. H. Lane, Mrs. Julia
Abbott, Mr. and Mrs. C. H. Lane, Jr.,
and daughter, Margaret went to Tripp
Pond and Mechanic Falls, Sunday in J.
W. Cummings' car.

Mrs. Maud Mann and daughter, Per-
sis, have gone to South Paris, where
Mrs. Mann will be housekeeper for
Freeland Penley. Leslie Marston will
also have a home with Mr. Penley.

Wirt McKenney of Greenwood,
Mass., is visiting his father, F. P. Mc-
Kenney, and other relatives.

Mr. and Mrs. Watson of Boston, who
were at P. S. Farnum's last week, are
there again this season.

The Red Cross benefit dance at Cen-
tennial Hall, Friday evening, was well
attended and a good time enjoyed.

The last services at the Universalist
church until the first of September
were last Sunday. Rev. and Mrs. D.
A. Ball are at Ferry Beach, and he
came home for the service Sunday.

Mrs. Charles Swan and daughter,
June, of Greenwood, Mr. and Mrs. E.
J. Mann and son, Lewis Jacob, and
Mrs. H. R. Tuell went to Lewiston,
Saturday with J. W. Cummings, and
Mr. and Mrs. Mann went on to Win-
throp. Mr. Mann drove home his El-
more auto which he loaned the Sunday
previous, and the car got out of use
at that place.

Miss Edith B. Jordan of Bridgton is
visiting at Dr. Wheeler's and Frank L.
Willis'.

Mr. and Mrs. Lewis M. Mann are
staying at their cottage at Bryant's
Pond.

Mr. and Mrs. A. J. Ricker have re-
turned from a two weeks' visit with
their son, Arthur Ricker, at Berlin, N.
H.

Dance at West Paris, Friday even-
ing, Aug. 3. Admission 25 cents to
all. Music by Shaw and True. Dance-
ing at 8:30. All invited.

THE PATROL MAINTENANCE
LAW.

As there appears to be more or less
misunderstanding relative to the opera-
tion of the Patrol Maintenance law,
as called, the State Highway Com-
mission desires to make the following
statement:

The Patrol Maintenance law was en-
acted by the legislature in 1915 for the
sole purpose of helping each and every
town in the State in maintaining nine
or ten miles of their principal thor-
oughfare and to make it possible for
the state to apportion maintenance
money from the automobile license.

All the money used for maintenance is
taken from this fund and by adding
the State's and town's appropriations
together it makes it possible to have
sufficient funds to employ a man and
team to work regularly some five or
six months during the road building
season.

The patrolman in nearly every in-
stance is hired upon recommendation
of the municipal officers.

The State's apportionment in 1916 to
the towns under patrol was not less
than \$200.00 except in a very few in-
stances where the towns had less than
nine miles of road under patrol and in
many towns it was very much more,
where traffic was heavy and either a
large amount of gravel was needed or
bituminous surface treatment was used
to maintain the road.

The State's expenditure in 1916 was
\$101,730.12.

Beginning the year 1917 the Highway
Commission apportioned each town an
average for patrol maintenance
\$200.00 and in addition to this made an
apportionment of \$50.00 for each town
for road machine work, provided the
town would furnish a like amount, this
fund of \$100 to be used on the section
under patrol maintenance.

Nearly all of the towns accepted this
offer; a few did not. On an average,
the few that did not in each town is about
\$500.00. It cannot be expected that any
of this amount can be used in building
or repairing bridges and culverts or
any other work where a large sum of
money is necessary, because there
would be nothing left to take care of

the road itself to do such work as a
patrolman is supposed to do. Instruc-
tions to patrolman are to drag the
road when the conditions are suitable,
after each rain, and to rake the rocks,
fill the depressions and add surfacing
material where it is most needed on
the section of road under patrol; ease
off the bumps over culverts and bridge-
es by adding material each side of
them; clean the ditches and culverts,
and keep the ditches on the hills in
such conditions as to prevent the water
from running in the center of the road,
keep open all the offset ditches, cut
the bushes around blind turns, and
keep the entire length of the section
under the patrolman's charge in the
best possible condition with the
amount of money available.

The patrolman is under immediate
supervision of the district supervisor
who lays out the work with more or
less assistance from the selectmen.
The supervisor reports to the State
Highway commission on his visit to
town the condition of the road, and
the instructions he gave the patrol-
man, etc.

In this way, the Highway Commis-
sion and the municipal officers and the
supervisors are in close touch with the
work at all times. The Highway Com-
mission believes that co-operation is
the way to obtain good roads which
the public are demanding more and
more each year, and the Highway
Commission is making every effort
within their power to help the towns
in the way of money, supervision and
co-operation.

Nearly all of the towns have shown
a willingness to co-operate in creating
a joint fund of the State's and town's
money and to employ a patrolman to
maintain and improve the main thor-
oughfare. This the Highway Commis-
sion appreciates.

In the towns of Acton, Amherst,
Alexander, Aurora, Beddington, Bol-
mont, Centerville, Charlotte, Clifton,
Crawford, Debiols, Grafton, Grand
Lake Stream, Jonesboro, Kenduskeag,
Lebanon, Liberty, Limington, Liver-
more, Mariaville, Marston, Meddybemps,
Northfield, Princeton, Sweden, Wales,
West Gardiner, Westley, Weston and
Whittemore the Highway Commission
as yet has been unable to make an
agreement with the municipal officers
in regard to patrol maintenance. Con-
sequently the Highway Commission
should not be held responsible for the
poor condition of the roads in all
towns.

KEEP GARDENS GROWING.
Fight Weeds, Cultivate, Water, and
Fertilize.

This is the time of the season when
the gardener is likely to allow the
weeds to get a start in the garden.
Right now the plants need every drop
of water, and weeds should not be al-
lowed to rob them. Weeds grow much
faster than cultivated crops, and if not
destroyed will rob the plants of the
moisture they need for forming fruit.
These fortunate enough to possess a
private waterworks, or who have city
water should make use of the hose to
supply the crops in the home garden
with needed water. The watering
should be done in the evening and by
the time the sun rises the next morn-
ing the water will have soaked in. The
soil should be cultivated about 24
hours after each watering in order to
prevent the formation of a crust on
the surface. Nothing retains soil mois-
ture like a finely broken surface. New-
er or allow soil in the garden to become
baked, as moisture is being lost.

It is an excellent plan to water egg-
plants, peppers, cabbage, cucumbers,
melons, celery, and other crops needing
highly fertilized soil, with manure wa-
ter. Have a barrel covered with fly
screen in which to prepare and store
the manure water. Give each plant an
occasional watering with this and the
added growth will repay you.

NOTICE.

The subscriber hereby gives notice
that he has been duly appointed ad-
ministrator of the estate of Guy D.
Cummings late of Albany in the Coun-
ty of Oxford, deceased, and given bonds
as the law directs. All persons having
demands against the estate of said de-
ceased are desired to present the same
for settlement, and all indebted there-
to are requested to make payment im-
mediately.

COMMISSIONERS' NOTICE.
OXFORD SS:

July 14th, 1917.

We, the undersigned, having been
duly appointed by the Honorable Ad-
miral E. Herrieck Judge of Probate with-
in and for said County, Commis-
sioners to receive and decide upon the
claims of the creditors of Emily O.
Furbush late of Fryeburg in said Coun-
ty, deceased, whose estate has been
represented insolvent, hereby give pub-
lic notice accordingly, to the order of
the said Judge of Probate, that six
months from and after the third Tues-
day of June, 1917, viz. June 19th, 1917,
have been allowed to said creditors to
present and prove their claims, and
that we will attend to the duty assign-
ed us at the office of Hastings & Son
in said Fryeburg, on August 25th, 1917
and Sept. 15th, 1917, and December 8th,
1917, at 10 o'clock in the fore-
noon of each of said days.

TOBIAS L. EASTMAN,
ALVIN D. MERRILL,

POEMS WORTH READING

OKIT.

By Reginald Davis.
There's a potent, pregnant something
That true-hearted men admire,
And it isn't form or beauty and it
Isn't dash or fire;
It's a steady, pounding essence when
The side are very great,
And a steady, stubborn defence when
The cause is lost for aye;
It's the seal of all good fighters who
Strike at man or fate,
They stand throughout the struggle,
Steady, grim and just and true,
It's the stuff they have within them,
That lets us know their hearts are true,
Take it, reader, and be true—
It's Orit.

There's a will and tender challenge
That makes a heart or man,
That says "You can outplay me, you
Must win it if you can,
But I'm here to stand beside it
The best while I can,"
And you'll find your path blocked
Through you still may stumble
through;

But I'm here to stand the stamping,
I'm a man who speaks,
And I stand or fall thus speaking:
"It's all a man can do!"
Such are men who take a thing,
Take it, reader, never kicking,
Keep coming, never quit!

It's the thing the world is needing
In the life-time everywhere,
The strength that passes knowledge,
The fighter's passion fair,
The strong will that the world needs,
That spirit is not weak—
It's the everlasting something that
Wins its goal at last,
The work that stands and lasts when
The world is passing away,
When the last flame is over and the
Season's strain is past.

All who strike at them shall know it,
For the fighters always show it,
Not wisdom, brain or wit,
But Orit!

TILL THINGS TURN UP.
My heart to the man who are doing
Things new,
My hand to the spirit that lead us
on
To the summit bearing a quail's brow,
To the tales that tell in the light
of dawn,
My cheer for the soul that are taking
hold,
That are peering into the world's
bright eye,
It is they that are servants as true as
gold—
Not those who are "waiting till
things turn up!"

A song for the men who go right ahead
Turning things up at a merry gait,
The world would be dull in a dream
that is dead
If every one stood by the road to
wait.
Anybody can wait—but the world
Is hungry for men of the other kind,
Who are brave, bold spirits, as destiny
bids,
And go forth willing to fail and fail
again.

It's a destiny that they hold in hand,
And I stay for them, and I cheer
them forth—
The men who are turning things up in
the land,
From the sun-kissed South to the snow-
capped North,
Anybody can "wait till things turn
up!"
But the chosen few are the ones to
cheer,
As they carry their wine of success in
the cup,
That they lift to our lips while it
sparkles clear!

"Dance Fortune is smiling upon us,"
say we,
Yet somehow she passes ME by;
Good-bye, I can't raise a Boffa
to "V,"
And my friends are all better than I

So now I will pray for a happier day,
When the "High Cost of Living"
is low—
When we'll live in peace, in the old-
fashioned way.
That we did in the long, long ago,
Portland, Me. EDWARD W.

FATHER USED TO MAKE.
Said a young and fearless husband
To his inexperienced wife,
"If you would but give up leading
Such a fashionable life,
And devote more time to cooking—
How to talk and when to bake—
Then, perhaps, you might make pastry
Such as mother used to make."
And the wife, resenting, answered
(For the words will mean, you know):
"If you would but give up horses
And a score of clubs or so
To devote more time to business—
When to buy and when to stake—
Then, perhaps, you might make money
Such as father used to make."
—The Scholar's Republican.

A HYMN FOR FARMERS.
(Written by John G. Whittier for a
banquet of the American Hortical-
tural Society.)
O planter of the fruits and flowers,
We own thee wise design,
Whereby these human hands of ours
May share the work of thine.

Apart from thee, we plant in vain
The root and sow the seed;
Thy sun and thy later rain,
Thy sun and dew, we need.
Our toil is sweet with thankfulness,
Our burden is our boast!
The sun of Earth's gray morning
The blessing of its soot.

Why search the wide world everywhere
For Eden's unknown ground?
That garden of the primal pair
May nevermore be found.
But, blessed by thee, our patient toil
May yield the sweetest fruit,
And give to every clime and soil
The beauty lost so long.

Our homestead flowers and fruited trees
May Eden's orchards shame;
We taste the sweets of these,
Like Eve, without her blame.
And north and south, and east and west,
The pride of every zone,
The fairest, rarest, and the best,
May all be made our own.

His earliest shines the young world
sought
In hill graves and in bowers;
The first offerings either brought
Were thy own fruits and flowers.
And still with reverent hands we call
Thy gifts, each year renewed;
The good is always beautiful,
The beautiful is good.

GOD PROTECT AMERICA.
By "C. E. M." a Veteran of the
Philippine Insurrection, Who Is
Now in the National Soldiers'
Home, Maine.
Almighty God, to whom we trust
The destiny of Freedom's Fatherland!
Armed in a cause humane and just,
Inspire our leaders to command!
Strengthen our faith! Give courage to
endure
Whate'er befalls the land
The rights of human liberty defend!
O God champion all America's need!

Almighty God, with Loyalty imbued
The alien races come within our gates
Teach them to live as neighbors true
Obedient to law, and love the State!
Hear them our flag! And in the bat-
tle hour
May it inspire our arms to victory!
Crest with Thy strength the tyrant's power!
Be thou our shield! Protect America!

You Run No Risk under the Triple Guarantee of William Tell Flour

William Tell Flour is sold under a triple guarantee. It is stamped with the Ohio Butter Flour Label, which signifies that it has met every requirement for license to bear this guarantee. The Ansted & Burke Company, who make it, guarantee it to you. The grocer adds his guarantee and it comes to you with all these guarantees behind it. Every sack of William Tell Flour is sold under this triple guarantee, that it will give complete satisfaction when properly handled.

William Tell Flour is made in Ohio—right in the Miami Valley, where the rich limestone soil gives it a delicious flavor and wonderful baking qualities. You can use it for everything—bread, rolls, cakes and pastries—and every thing will taste just a little better. William Tell Flour takes the ache out of bake and puts the flavor in.

Use WILLIAM TELL Flour

Get the best of baking and the best for by buying in your own store.

FARM SHEEP RAISING.
Adequate Protection and Convenient Equipment for Flock Possible at Moderate Cost.
Equipment for raising sheep on farms need not be expensive, says a specialist in the United States Department of Agriculture. Elaborate and expensive structures do not insure economy in management and are not essential to the welfare of the flock. In mild latitudes, little housing of any sort is needed, but where winters are longer and more severe, some protection from storms is required. Under such circumstances, the buildings in which it is proposed to house the sheep should be dry, well ventilated, and free from drafts, but no special provisions for warmth are required.

Where the flock contains 100 or more ewes, it is desirable to provide a separate building for it. Smaller flocks can be cared for in sections of barns which contain other stock. In Farm Bureau Bulletin 510, "Equipment for Farm Sheep Raising," a new publication of the United States Department of Agriculture, a number of plans are given for different kinds of sheep barns, and also for such other equipment as pens, feeding troughs, hurdles, and fences. A good supply of feed racks, grain troughs, etc., says the bulletin, can be provided at a small expense and will both save labor and prevent waste of feed.

Because of the wide differences in climatic conditions under which sheep are raised, it is impossible to recommend a particular type of building for universal use. A few fundamental principles, however, should be followed no matter what type of building is to be constructed. In the first place, the site should be dry and well drained. Ample yard space should be available adjacent to the main barn or shed, and it is desirable that this should have a southern slope with sandy soil. If, too, the sheep barn is located conveniently to the farmhouse or to other barns, much time will be saved in the performance of routine labor. This is important, because through a part of the year the flock requires attention many times a day.

In planning a barn it is well to remember that shade and protection from heat are necessary for sheep, and that these can not always be obtained in pastures. The building that is cool in summer, therefore, will often give greater comfort to the animals than they can obtain out of doors. More important requisites, however, are dryness and light. Sheep can not possibly thrive in quarters that are damp or dark. In fact, the flock should be kept in only during storms. One square foot of window in each 20 square feet of floor space is considered necessary. The windows should be placed at a height to insure a good distribution of light and, in particular, of direct sunlight for the lambing pens during the period the ewes are lambing.

The ewe suffers greatly if confined in poorly ventilated pens. It is therefore necessary to provide some means of securing fresh air without creating drafts. Where the building is very large, with numerous doors and windows, it is sometimes advisable to build one or two partitions from floor to ceiling. By opening mouth screens wherever an the side opposite to that from which the wind is blowing, fresh air can be admitted without causing drafts. In very cold weather, or where lambs are to arrive in the winter months, specially arranged outlets of fresh air and intake of fresh air will be necessary.

Level and well-drained, dry-out floors are cheap and satisfactory, the only objection to them being that they do not exclude rats. For sheep and feed rooms concrete floors are recommended.

GIVE YOUR DOG MORE WATER.
Fully one-half of canine misery comes from lack of drinking water. The agency of thirst frays dog temper to the violence point, and impatient animals are much like cross human beings, ready to resent an act or look. Thoughtful families leave basins of fresh water where many animals can find it, but they are not many, and they will never do as much good as running water in place where it can be reached at will. Dog lovers are many, but they do not always give due attention to the animals which more than repay their kindness and affection. Let us make a resolution to use our influence to establish a few sensible provisions of fresh water for all animals.

SOUTH PARIS
Mrs. Lora (Everett) Chapman of Bethel has been spending a few days in town visiting some of her school mates. Miss Marion Skirtevant of Rome is the guest of her cousin, Mrs. Nell Brown, of Myrtle street.
Ernest E. Clason of Lisbon, who was a former high school principal here and now has a position with the American School Book Company, was in town, recently.
Carrie Clifford is at home from her teaching with her parents, Mr. and Mrs. Wallace Clifford.
Mr. and Mrs. Clarence G. Morton and two children, Hugh and Helen, made an automobile trip to Portland, Thursday, and Mrs. Morton's mother, Mrs. George Hayden of Haverhill, Mass., met them in Portland and returned with them for an extended visit.
The Methodist church is closed for the next two weeks, all services to be resumed the first Sunday in August. The Universalist church is closed for six weeks until the first Sunday in September. Services at the other churches as usual for the next two weeks.
Mr. and Mrs. I. H. Stuart have for a guest their daughter, Mrs. Lorna Wheaton, of Bridgeport, Ct., who will remain at least a month.
Mrs. William O. Frothingham is visiting her home in Perry and will remain several weeks with relatives in Bangor.
Miss Davis Kerr is working at the Norway Hand Laundry.
Henry Shaw is out of town for a few days.
Chester Eason, who has been working in Portland is visiting his mother, Mrs. Tibbott, before joining the Coast Artillery Corps.
Helen M. Barnes left Saturday for Mt. Castine Normal school, where she will attend the summer teachers' course.
Harold Cole is on a two weeks' vacation from P. N. Wright's store.
Miss Ellen Blake, Mrs. Elizabeth Edgley, Mrs. W. A. Blake and Alice Blake enjoyed a one day trip to Wilton recently to call on Mr. and Mrs. E. P. Parilla. Harry D. Cole took them in his car.
Florence Green is visiting her sister, Mrs. Frank Danham.
Halph Young of East Weymouth is a guest of his aunt and uncle, Mr. and Mrs. J. J. Murphy of Market square.
Miss Caroline Gray is the guest of friends in Lewiston.
H. M. Rockwell of Winthrop has been here gathering boys for the Junior Volunteers.
Miss Marion Skirtevant is stopping at Mr. and Mrs. Nell Brown's.
Mr. and Mrs. Al Hatch have returned from their visit with Mrs. Jane Hatch.
Miss Hazel Miller of Waterford is visiting her sister, Mrs. James Perry, who is seriously ill.
Master Leslie Bryant of Bryant's Pond is visiting his grandparents, Mr. and Mrs. Oscar Swain.
Miss Evelyn Wright has returned from her vacation in Veleboville.
Mr. and Mrs. Geo. Doran and family have returned from their trip to Rock Creek, Minn. On their way back they visited relatives in Canada.
Stanley Shurtliff, who is working at Providence, R. I., is home on a vacation.
John Holmber of North Branch, Mass., is visiting Mr. and Mrs. Geo. Doran.
Mrs. Allen C. Deering of Albuquerque, New Mexico, is visiting her brother, H. N. Chapman. She is under appointment of the A. M. A. as teacher in the Rio Grande Industrial School in Albuquerque.
Mrs. Harrington Mann, formerly of West Paris, has moved into G. W. Penley's house on High street, and will be housekeeper for Mr. Penley. Her daughter, Fern, and Leslie Marston will be with her. Mr. Mann has been for some time at the state sanatorium at Hebron.
Mrs. Beatie Cushman of Bethel and three children were recent guests at T. P. Thibodeau's, also of her sister, Mrs. James Barrett of the Mountain District.
Principal John H. Carver of the high school, who is spending the summer at Lewiston, was in town a few days the first of last week. Mr. Carver has resigned his position as principal of the high school, in which he has given much satisfaction during his service of four years. Miss Lora L. Frank, who has been principal of the grammar school, has also resigned, and there will be other vacancies in the list of teachers. Announcement of the new teachers is not yet ready.
There will be an open-air meeting in the square Friday evening at 7:15, addressed by Miss Lora Walker, a speaker and organizer of the State Suffrage Association, who will work in this section of Oxford county the week following July 29. There will be music and other attractions. If the weather is bad the meeting will be held under cover, the place to be announced later.

QUARRIES, FACTORY LOCATIONS, MILL SITES, FARMS, SITES FOR SUMMER HOTELS AND CAMPS.
Located on the line of the MAINE CENTRAL RAILROAD give opportunity to those desiring to make a change in location for a new start in life.
UNDEVELOPED WATER POWERS, UNLIMITED RAW MATERIAL AND GOOD FARMING LAND
Await development.
Communications regarding locations are invited and will receive attention when addressed to any agent of the MAINE CENTRAL, or to
INDUSTRIAL BUREAU, MAINE CENTRAL RAILROAD, PORTLAND, MAINE.

SOME OF BETHEL'S GREAT FISHermen.
Jotham S. Chapman.
Says Harry to Liffey.
I've been thinking of late,
That you and I are walking
Just a little too straight.
So to have a slight change,
And the time of our lives,
Let's go up Bull Branch fishing—
And not take our wives.
Eugene Martyn and Geo. Harding
We will invite,
For both are great scrappers,
Should we get in a fight.

George will furnish the fish hooks,
We don't need any run,
If we don't bust our tires
We sure will go some.
And if we do go,
And only half try,
What fish we don't catch
Wouldn't make a great fry.
So those four, pompous fishermen
Started off in great glee,
Like a lot of small boys
Going on their first spree.

After leaving their auto
Near Stillman's old house,
They stole up Bull Branch
As still as a mouse.
After fishing for hours
Without getting a bite
George says, "Look here boys
We are not fishing right."
"I will wade to the middle,
I don't want a crown,
But I'll dip up all the fish
You fellows drive down."

And Ira, left alone,
All day in the store,
Expected they'd catch
A barrel or more.
And took their long absence
As having great luck,
Was about to send for their fish
Thursday's big truck.

But just before dark,
With their heads hanging down,
Their little fish larvae
Took them back into town.
For four little boys,
They might call it a plenty—
Of very small fish
They had about twenty!

Sometimes an over-giving person is hard to get started.
Another have affairs in the best of meat for a broken heart.

BURD COLLEGE

Opportunity

Everybody realizes that now is the most opportune time to start in business.
Burdett College was unable to fill more positions offered to its graduates last year.
The demand is growing constantly. Good opportunity for rapid advancement are always open.

FALL TERM BEGINS TUESDAY, SEP. 18

For further information, send for our prospectus. It is free. It is full of information. It is the only one of its kind. It is the only one that is up to date. It is the only one that is reliable. It is the only one that is worth reading.

The Burdett College, 18 Boylston St., Boston, Mass.

POULTRY HOUSES.
By G. E. Conkey.
At this time of year when the work of breeding and starting the young chicks is finished and before the drive is on to get the treasured fall and winter eggs, poultrymen find time to plan and attend to the building of new and better poultry houses or the altering of old ones. Poultry houses that give comfort and health to the flock will also make the work of caring for the stock easier for the poultryman.
Trying to do this work during the rush of the season means overlooking or slighting important details, and though you spend just as much you will not get as good returns for your money.

You will find all kinds of books and articles on the subject of poultry housing, but when it comes to applying this knowledge to your own particular case you will have ample opportunity for the use of good judgment. Give proper consideration to selecting the right type of house for your flock; don't locate the buildings until you have taken every factor into account.
Having decided what you want and where you want the building, stick to some well defined principle of construction and you will have less disease and more vigor in your stock. Take advantage of the experience and experiments of others and you will be more successful in making your poultry pay.

DON'T OVERCROWD.
One of the commonest mistakes, often due to false economy, is overcrowding. Overcrowding means disregard of the health and comfort of your flock and that means poor results. Before you start working decide just how many birds you expect to keep and then give them a little more room than you think they need.
The breed kept and the experience and ability of the person keeping them determine somewhat the number of birds that can be kept in a house of a certain size, but as a general rule allow 15 square feet of floor space to each bird.

LOCATION.
If you have a choice of available land, choose a spot where the soil is of a loose nature and well drained. Land sloping to the south or southeast provides the sun radiation that is so important in securing natural warmth and ventilation and is highly desirable.
If you are restricted to ground that is not naturally dry, make it so by staking in the spot to be occupied by the building. If you expect to have a dirt floor in the house, build up the foundation walls a foot or a foot and a half above the ground level and then build up on the inside with cracked stone or cinders. Cover this with dirt and you will then have a dry floor even though the outside conditions are poor.

Try and have the house face in a southerly direction as this will provide a maximum amount of sunshine during the winter months. If the house at the same time faces a little to the east, the front of the building will be sheltered from the wind and the house will warm up earlier in the morning.
Poultry houses set in an orchard or among shade trees work out well for both poultry and the orchard. It is an ideal combination. If there are no trees, set out a few close to the house so that the birds will be comfortable in hot weather. Poultry must be protected from the burning rays of the summer sun, otherwise vitality will be lowered and you will lose both birds and profits.

TYPES OF POULTRY HOUSES.
There is no best "type" of poultry house, because different conditions and different sections of the country require different types of houses. However, there are certain principles involved in building a poultry house that will hold true at all times. Therefore, before planning your poultry house study your own requirements and

the need to which you can type of your requirements. If you will though it is not easily a work re-narrow adapted tion and positive.

BURDETT COLLEGE

Opportunity Calls

Everybody realizes that now is the most opportune time to get a good start in business. Burdett College was unable to fill more than about one-half of the positions offered to its graduates last year. The demand is growing constantly. Good positions offering opportunity for rapid advancement are always open to Burdett graduates.

FALL TERM BEGINS TUESDAY, SEPT. 4
New students admitted every Monday and advanced students every Tuesday.
A good position is provided every graduate.
New Catalogue sent on request.
Night School begins Monday, Sept. 24.

The Burdett College courses are: Business, Accounting, Secretarial, Bookkeeping, Auditing, Bookbinding and Manuscript, Normal, Civil Service, Shorthand, Filing, Spanish, and Special.

18 Boylston St., Boston, Mass.

POULTRY HOUSES.

By G. E. Conkey.

At this time of year when the work of breeding and starting the young chicks is finished and before the drive is on to get the treasured fall and winter eggs, poultrymen find time to plan and attend to the building of new and better poultry houses or the altering of old ones. Poultry houses that give comfort and health to the flock will also make the work of caring for the flock easier for the poultryman.

Trying to do this work during the rush of the season means overlooking or neglecting important details, and though you spend just as much you will not get as good returns for your money.

You will find all kinds of books and articles on the subject of poultry housing, but when it comes to applying this knowledge to your own particular case you will have ample opportunity for the use of good judgment. Give proper consideration to selecting the right type of house for your flock; don't locate the buildings until you have taken every factor into account.

Having decided what you want and where you want the building, stick to a well defined principle of construction and you will have less disease and more vigor in your stock. Take advantage of the experience and experiments of others and you will be more successful in making your poultry pay.

DON'T OVERCROWD.

One of the commonest mistakes, of ten due to false economy, is overcrowding. Overcrowding means disregard of the health and comfort of your flock and that means poor results. Before you start working decide just how many birds you expect to keep and then give them a little more room than you think they need.

The breed kept and the experience and ability of the person keeping them determine somewhat the number of birds that can be kept in a house of a certain size, but as a general rule allow five square feet of floor space to each bird.

LOCATION.

If you have a choice of available land, choose a spot where the soil is of a loose nature and well drained. Land sloping to the south or south-east provides the sun radiation that is so important in securing natural warmth and sanitation and is highly desirable.

If you are restricted to ground that is not naturally dry, make it so by digging in the spot to be occupied by the building. If you expect to have a dirt floor in the house, build up the foundation walls a foot or a foot and a half above the ground level and then build up on the inside with cracked stone or cinders. Cover this with dirt and you will then have a dry floor even though the outside conditions are poor.

Try and have the house face in a westerly direction as this will provide a maximum amount of sunshine during the winter months. If the house at the same time faces a little to the east, the front of the building will be sheltered from the wind and the house will warm up earlier in the morning.

Poultry houses set in an orchard or among shade trees work out well for both poultry and the orchard. It is an ideal combination. If there are no trees, set out a few close to the house so that the birds will be comfortable in hot weather. Poultry must be protected from the burning rays of the summer sun, otherwise vitality will be lowered and you will lose both birds and profits.

TYPES OF POULTRY HOUSES.
There is no best "type" of poultry house, because different conditions and different sections of the country call for different types of houses. However, there are certain principles involved in building a poultry house that will hold true at all times. Therefore before planning your poultry house study your own requirements and

the needs of the breed of birds you expect to keep and the purposes for which you expect to keep them and you can then easily determine the type of construction that will meet your requirements.

If you expect to keep a large flock you will need more than one house although this may be avoided by following out the continuous type of construction. Whichever type you do adopt it is absolutely necessary because you can handle large buildings more easily and large flocks will lessen the work required of you. Do not build a narrow or shallow house. They are not adapted to modern ideas of ventilation and furthermore they are more expensive to construct.

VENTILATING THE HOUSE.

It has been definitely proven that fowls require an abundance of fresh air at all times if they are to be kept in a healthy state, therefore the tightly closed houses of the past have been abandoned. The modern house provides for proper ventilation by the manipulation of windows, following out certain well defined principles, or by means of open fronts or muslin covered openings.

Size considered, the fowl uses up more oxygen from the air than any other breathing creature. Having no sweat glands, it never sweats but throws off all moisture through the breath. As the fowl's body temperature averages as high as 106 degrees, the moisture in the breath coming in contact with the cooler air, very quickly condenses and so has a tendency to make the house damp in cold weather. If the ventilation is poor the interior walls of the house will frequently be covered with hoar frost in winter and at times they may even be dripping wet. This excess moisture is taking up by the litter on the floor and the health of the birds is greatly endangered by the resulting condition.

To secure good ventilation, give plenty of thought to the arrangement or regulation of fresh air openings. The house must have plenty of fresh air but drafts must be avoided. Make use especially of the roosting quarters are out of range of any direct current of cold air, otherwise results will be disastrous. Improper ventilation is the starting point for most of the trouble poultry raisers have with roup, colds and other respiratory diseases.

SUNLIT HOUSES.

Sunlight is life and in cold weather an abundance of sunlight is needed for warmth and sanitation. Every poultry house must provide for giving the birds plenty of sunlight. By facing the house in the right direction and properly arranging windows and open spaces, you can provide for the entire floor space receiving the direct rays of the sun at some time during the day. Sunshine is a wonderful germ destroyer and air purifier. Sunshine warms the house in winter and makes the surroundings more congenial. Sunshine is nature's own tonic for your birds and it has a direct influence on egg production. Sunshine and fresh air mean vigorous, healthy, well-blooded hens and these are the kind of hens you must have if you want to keep your egg basket heavy.

BONGO POND.

Mrs. Ora Squidore, who has been spending a few days at Hanco Farm, has returned home.

Mr. and Mrs. Leslie Kimball and children called on Mrs. E. P. Brown, Sunday.

Mr. and Mrs. Almer Kimball, with Fred and Leonard, also George Morgan, were in Berlin, Sunday, the guests of Mr. and Mrs. Eugene Groves going by auto by way of Gratton.

Mr. and Mrs. Earl Bunch of Auburn visited her father, Mr. F. H. Bennett, the last of the week.

Ted Baker is working for Sheldon Graver.

Urbain Desnoyer took in the circus at Lewiston, Monday.

WHY NOT BUY IT IN MAINE?

BRIDGES AND APPROACHES

Modern Structures Neither Durable Nor Artistic.

ANCIENTS BUILT WELL.

To Achieve the Proper Result the Engineer Should Co-operate With the Architect in the Design of the Bridge and Its Approaches.

By FRANK KOESTER.

(Consulting civil engineer Hudson Terminal building, New York, and author of "Modern City Planning and Maintenance.")

Of all the structures erected the bridge is possessed of the greatest individuality, unity and feeling. It is at once an inspiration and a utility, and it marks as no other structure does the progress of man from barbarism to civilization. It is one of his greatest triumphs over nature's obstacles, for it is not only an evidence of his ability to merely construct—that is, to place one stone upon another—but of his ability to think and so to utilize the forces of nature as to cause one stone to stand upon another with nothing directly beneath.

A building can never produce the sense of unity of the bridge and thus can never inspire as the bridge does, because, while portions of a building may be eliminated and still leave it a building, the elimination of a portion of a bridge means its destruction for the purposes for which it is erected.

The bridge occupies thus a unique position among the structures of man, approached only by the dam, to which, however, it is far superior, since the dam always lacks in the sense of self evident security which the bridge imparts.

Not only is the bridge unique in its position among structures, but it is the largest single structure erected by man and the most costly. It is also highly important in point of numbers

BRIDGE OVER THE RIVER IN PARIS.

and in the investment involved. There are, for example, some 80,000 metal bridges in the United States, or one for every three miles of railroad, and they aggregate 1,400 miles in length, representing an investment of \$500,000,000, or several times the cost of the Panama canal. The subject of bridges is therefore one which demands the most careful attention of all who have to deal with it. It is not a subject which should be reserved to the officials and engineers in charge, but is one in which the public should take an active and decided interest. When a bridge of any consequence is to be erected the designs should be open to public inspection and all objections and suggestions should be dealt with in advance.

The pleasing psychological and aesthetic effect of bridges has been recognized since the earliest times, but great bridges are a result of modern invention, being dependent upon the cheap production of steel for their evolution, since stone bridges have never been constructed in anything like the great spans of the modern steel bridges. The railroad, too, has greatly increased the necessity for bridges, so that except for the comparatively small stone bridges of ancient and medieval times, the principles of which were early mastered, bridge building is a modern science.

The success achieved has been little less than stupendous in a material and engineering sense, for enormous structures have been erected which meet the demands of traffic and the various conditions which were presented.

In two respects, however, the modern bridge is far from a great achievement. It is neither artistic, nor will it have the long life of the ancient stone bridges. The Roman 2,000 year old stone bridges, which are in use today, but so modern metal bridges, even with the most careful attention, can be expected to last even a small part of such a period. Even if protected from the action of the elements, the steel which is used in the construction of modern bridges will be subject to corrosion from the effects of vibration, thus all our steel bridges are temporary structures. This, however, will in the last case prove a matter of construction, as when they pass away they will be undoubtedly replaced by more artistic structures. Only our stone bridges, however, may be expected to endure into the era of new races, if such are to succeed us.

A NIGHT OF TERROR

Peculiar Experience With a Deadly Mexican Tarantula.

PENED IN A DARK BEDROOM.

The Trying Ordeal Through Which a Woman Tourist Passed in a Hotel at Vera Cruz—Awaiting the Bite That Meant Madness and Then Death.

The tarantula is much larger in Mexico than in Italy. His four pairs of fuzzy legs, his speckled bulging belly, his abnormally fat head, armed with vicious fangs and equipped with eight eyes arranged in transverse rows, suffice to fill you with a wholesome dread to give him the right of way without ado.

Owing to the fact that he has an unwelcome habit of leaving his own realm in the tropical vines to make feeble little visitations to the corners of your bedroom it had always been my custom to search every nook and crevice of my sleeping room before retiring for the night. Twice had I seen native laborers, peons, in the agony of death due to a tarantula bite. So it was not surprising that this creeping thing headed my list of the many dangers to be shunned in Mexico.

I had just reached Vera Cruz from Mexico City, very tired, and decided to seek my room early in the evening, while, indeed, in the only safe and proper thing for an unaccompanied woman in Mexico to do. That part of the diligencias in which my room was located was evidently undergoing repairs, for a pile of lumber was included in the furnishing of my apartments.

No particular reason occurred to me why I should investigate this lumber, and, little realizing that it might shelter lurking danger, I flung my weary head on the dirty pillow. But as I lay quietly dozing off to sleep I suddenly heard a soft little noise, which one might describe as a cross between a hum and a hiss.

As a precaution against the many venomous things that creep and crawl over in the well beaten paths of Mexico I had made a careful study of the arachnids, to which class the tarantulas belong. I recognized that soft unostentatious warning that announced a roommate as undesirable as one could well wish.

Cautionally I stretched out my hand to see if by chance there were some moths on the little stack near my bed, with the result that I knocked the unlighted candle upon the floor. That was enough for my mettlesome roommate; he had been personally insulted by the noise, and suddenly in the utter darkness, that black stillness which one feels in a strange room, I detected a sickening odor, the warning of the angry tarantula.

I strained my ears to detect the soft, characteristic click that the male, the deadliest of the species, employs as a flaccid cry to his malicious song. My blood chilled as I heard his muffled hum-click, hum-click, hum-click—apparently not three feet away. I held my breath, incidentally my nose, and my wondering how long it would be ere I should feel his big fuzzy feet sneaking up the side of my neck or before his soft woolly body would light upon my face. It was not at all comforting to remember that one of a tarantula's deadliest weapons is his long history, on the ceiling directly over the object of his anger and then to drop unceremoniously upon his victim.

It was the only time in my life when I longed for the bliss of ignorance. Would to heaven I had not studied this hideous horror of the tropics! But I had. Moreover, I had seen the awful effects of his worse than fatal bite whose work of destruction was mercilessly long drawn out.

If the bite of a male tarantula infects a large artery it draws the victim into a dreadful state of convulsions. The incipient stages of the poisoning are accompanied by accentuated melancholia, followed by a shattering of the memory. On gradually absorbing the venom the unfortunate subject reels and tumbles in a mad whirl until he swoons from pure exhaustion. The tarantula, the graceful Italian dancer so often described in musical literature, derives its name from this hideous poisoning.

All this and more darted through my mind as I lay there in the darkness wondering if I, too, were doomed to die like a dervish. As the night wore on the buzzing grew less sedulous. I lay motionless during the thousand years till dawn, which came at last, a dimly soft, blue, shimmering shaft of light, which made things faintly visible. Cautionally I drew myself up to a sitting posture and craned my neck in a searching survey about my chamber of horrors.

There, in torture worse than mine hung my roommate, four of his legs pinned beneath the linens. There he sprawled, a motioned but angry prisoner. His right eye winked up a malignant "good morning," and I forthwith returned the compliment with the steepest shaft of my battle—New York Sun.

The Easiest Way.
"I want the wages of a man; that's all I'm asking," said the "Votes For Women" orator.
"Then," I said as he rose to speak, "I contend it isn't a vote to the lady wants. All she has to do is to get married."—Ladies' Home Journal.

Prefer loss before unjust gain, for that brings grief but ease; this for ever.—Child.

LIFE IN THE LONG AGO.

When Huts Were Homes and Beds Were Shakedown of Straw.

For centuries the common people of England made their home in wooden huts of one room. When a family increased in numbers or wealth another hut was built beside it, or, rather, a lean-to was added and then another and another, as need required.

Sometimes they followed a straight line. At other times they were built out from the central hut at various angles. The roofs of these huts were thatched. An opening was left in the center for the smoke to escape. The fire was always built in a hollow in the center of the room. Beds were made of straw. Often they were merely shakedown in the corner. Occasionally the straw was held in a little frame resembling the ribs of a ship.

Houses built by Saxon knights were much more pretentious. They were big halls, like the Roman atrium, with a lofty roof thatched with straw or wood shingles. The floors were of hard clay. In the middle was a great fire of dry wood. The thin, acid smoke from the fire escaped through an opening in the roof directly above the hearth.

Round the fire were long benches, on which hearthsmen and visitors sat when not fighting or at work, and talked and drank the hours through. The tables were long boards on trestles. At night the floor was strewn with straw, and, like the less prosperous folk, host and visitors slept together.—Youth's Companion.

CURIOUS MEXICAN TREES.

One Whose Fruit Is the Counterpart of the Green Parrot.

Mexico probably has a greater range of remarkable vegetation than any other country in the world. The parrot fruit tree produces an odd shaped fruit, bearing a close resemblance to green parakeets. When the parakeet is frightened it makes a dash for the parrot tree, where it assumes a position which makes it look like the fruit itself. So close is the resemblance that their enemies, the hawks, occasionally fly by a tree on which a dozen or more of these birds are sitting, apparently unaware of their presence.

Another remarkable tree is the arbol de dinamita—dynamite tree—whose fruit, if kept in a warm place, bursts with considerable force and a loud report, scattering its flat seeds to a surprising distance.

One of the most interesting fruits in Mexico is known as the melon zapote, or papaya. It contains considerable pepsin, which reacts against both acid and alkaline conditions of the stomach, and it is said that a diet which includes papaya precludes dyspepsia. Both the fruit and the leaves possess the singular property of rendering tough meat tender. When the pulp of the fruit is rubbed over a piece of tough meat the juice attacks the fiber and softens it.—National Geographic Magazine.

Mexico's National Newspaper.

One of the most remarkable institutions in the City of Mexico is the *Monte de Piedad*, or national pawnshop. The monte is one of the oldest buildings in the capital, having been built for the private residence of Cortes in 1520, and it has been fortunate enough to escape the hands of restorers. It was acquired in 1744 by Count de Regla Terreros, who laid out \$300,000 in organizing the Monte de Piedad, with the idea of saving the needy from the usury of the ordinary pawnbroker. Its success is attested by its long history, and Mexico today can get one-third value on their goods at a rate of interest seldom exceeding 3 per cent per annum. If any one fails to keep up his payments the deposited goods are sold, and any balance over the sum advanced is handed to the depositor.

A Menstrually Among Newspapers.

Those who object to the widespread newspaper may see the apotheosis of their bete noire in the museum at Aix-la-Chapelle, the only existing copy of the *Illustration* Constellation, published in New York in 1850. Happily this monstrously did not survive the first issue, for its pages measured eight and one-half feet by six feet, and each contains thirteen columns forty-eight inches long.

By way of comparison it may be mentioned that the smallest newspaper in the world is the Mexican *El Telegrafo*, with pages four inches square.—London Chronicle.

Stoats Hunt in Parks.

In some years stoats appear to be more numerous than in others, and they are seen not in ones and twos, but in dozens, hunting together in small packs. Stoats will hunt together from scent and in full cry like a pack of hounds, one always keeping the line and followed closely by the others. This sight has been recorded by different observers who have also seen weasels hunting in the same way.

Valuable Services.
"I have indeed done a service," the orator declared. "I have given the people cause to think."

"That was something at least," "Yes, oh, yes. But I have done a further service. I have told them just how to think."—Buffalo Express.

Silent Service.
"Don't you like silent service in the house?"
"Sure. That's one reason we put in a dumb waiter."—Baltimore American.

Making Connections.
Knicker—Life is hard, Barker—Yes, by the time your mother stops forbidding you to eat jam the doctor begins.—New York Sun.

[This matter must not be reprinted without special permission.]

Smoking a bruise, cut or nail wound with burning wool or woolen cloth is said to be an excellent preventive of inflammation and possible after effects in the shape of lockjaw.

The Hudson river district in New York is credited with having produced 1,025,808,000 bricks in 1913, having a value of \$4,030,001. The average price obtained for these bricks was \$5.50 per 1,000.

The mixing of religion and politics is a thing not to be feared provided the right kind of religion is mixed with the right kind of politics. When both are off color there is usually the old Harry to pay.

Bitter odors of one kind and another, among which that of leeks is quite likely to predominate, may be largely prevented by keeping cows from infected pastures for a period of four hours before milking.

Gray county, Kan., although in the dry belt, claims the finest, if not the largest, field of wheat in the world and lacks its claim up with a large cash prize for a field of its size anywhere that will equal it.

From the standpoint of maintaining soil fertility, dairying is better than beef raising because of the fact that a ton of best sold removes about \$2.50 worth of fertilizing elements, a ton of milk 64 cents' worth and a ton of butter practically no fertilizer at all.

If you have hard water, try putting a clean clam shell in the teakettle or reservoir. Some one has found out that when this is done the lime which the water contains and which is precipitated by boiling will stick to the clam shell instead of to the sides and bottom of the kettle.

In spite of the fact that twenty-five years ago hardly any farmer in a thousand or more had heard of alfalfa as a hay and pasture plant, today the state of Kansas alone has more than a million acres devoted to growing the legume, while Nebraska has nearly two-thirds as many acres engaged in the same line of production.

Field beans will produce a crop if planted any time during June, though the chances of damage by a frost will be less if they are put in by the 20th. In the average small garden a fair crop may be secured by planting the beans in the patch of early potatoes, the vines occupying the ground after the potato vines are dead.

The Wisconsin Agricultural college is sending out to dairymen Bulletin No. 27, which is devoted to directions for using the Babcock tester. The circular explains each step of the process in detail and is fully illustrated. A convenient method of keeping milk records is also outlined. Every dairymen who can get one should have one.

The writer has seen suckers of one kind and another and has even heard of pig sucking cows, but that was an entirely unique type he saw the other day when on a country trip a six-month-old calf was contentedly extracting nourishment from a beaver's tail. It is putting it mildly to say that the spectacle would have done for a dime museum.

Folks who live out in the dry country will be interested in a bulletin issued lately by the Nebraska experiment station on "Vegetable Gardens on Irrigated Farms in Western Nebraska," the bulletin being a report of operations at the Scotts Bluff station. The bulletin is free and may be had by addressing the experiment station at Lincoln, Neb.

On the Minnesota university experimental farms the directors overcome the difficulty of stock worms in sheep by pasture rotation at intervals of four months and giving the mature sheep a one or two ounce dose of gasoline at lambing time, with a small dose of epsom salts, and giving both sheep and lambs the same medicine in July and again in November and turning them into new pastures at the time mentioned.

In a recent essay contest conducted by the department of public roads and participated in by 5,000 boys and girls of the country, first prize was awarded to Amy Coon, a fourteen year-old girl living at Scammon, Kan. The subject treated in the essay was "The Repair and Maintenance of Dirt Roads." The subject read engineers judged the essay. The winner is to have her expenses paid to the American road congress, which meets at Atlanta, Ga., in November of the present year.
